Anti-tamper fixings

Mounts in a standard UK, 35mm, double gang back box

Suitable for use with Folknoll Custodial Cell Call Systems

## CUSTODIAL CELL CALL

Our custodial cell call products range offers a comprehensive collection of tough, reliable, standard cell call units, for use in Magistrates' Courts, Police Custody Suites and similar high security establishments. Our cell call range includes Cell Call Units, Corridor Reset Units, Landing Indicator Units, Wing Office Display Units, PSUs and event log file servers. We also offer **DISABLED CELL** and '**SAFER CELL**' options including Samaritan Call, alarm strips and panic buttons. Our cell call systems can be combined with CCTV, affray alarm, general intercom, door locking control/monitoring, building alarms and other custodial systems to provide complete security solutions.

## CELL CALL UNITS (CCUS)

Cell call units (CCUs) are usually installed in cells to enable occupants to call for assistance. When a cell call is initiated, the cell call system alerts staff and guides them to the source of the call by activating the associated corridor reset unit (CRU) and appropriate landing indicator units (LIUs). The source of the call will also be displayed on the appropriate wing display unit and/or workstations. Our standard range includes CCUs with additional facilities such as lighting control and we also supply custom devices to suit legacy systems, please contact Folknoll for further information.

## CC 9004-108: CCU, STANDARD

Our CC 9004-108 CCU, Standard combines a call button and large call progress LED into a vandal resistant brushed finish, stainless steel unit. The standard unit is annotated in black with the word **CALL**, alternative finishes and annotation are available on request.

## CALL BUTTON

The vandal resistant call button is used to call for assistance. The button must be held for at least 0.25 seconds to reduce the risk of accidental calls. On activation the alarm can be indicated to staff by the CRU, WDUs, LIUs and Workstations, depending system configuration.

## CALL PROGRESS LED

The large red dome LED is illuminated to indicate the progress of a call. Informing and reassuring the occupant that a call has been connected, etc.

## MOUNTING

These units can be mounted in standard UK, 35mm, double gang back boxes.

## APPLICATION

Suitable for use with Folknoll Cell Call, SMS and Police Custody Suite Systems
