**DESIGNED FOR USE IN TOUGH, HIGH-SECURITY
ENVIRONMENTS**

CUSTODIAL CELL CALL

Our NOMS compliant custodial cell call products range offers a comprehensive collection of tough, reliable, standard cell call units, for use in Magistrates' Courts, Police Custody Suites and similar high security establishments. Our cell call range includes Cell Call Units, Corridor Reset Units, Landing Indicator Units, Wing Office Display Units, PSUs and event log file servers. We also offer **DISABLED CELL** and **'SAFER CELL'** options including Samaritan Call, alarm strips and panic buttons. Our cell call systems can be combined with CCTV, affray alarm, general intercom, door locking control/monitoring, building alarms and other custodial systems to provide complete security solutions.

CELL CALL UNITS

Cell call units (CCUs) are usually installed in cells to enable occupants to call for assistance. When a cell call is initiated, the cell call system alerts staff and guides them to the source of the call by activating the associated corridor reset unit (CRU) and appropriate landing indicator units (LIUs). The source of the call will also be displayed on the appropriate wing display unit and/or workstations. Our standard range includes CCUs with additional facilities such as lighting control and we also supply custom devices to suit legacy systems, please contact Folknoll for further information.

CC7520.20F CCU, BASIC

The CC7520.20F is our cost-effective basic CCU with a single illuminated button mounted on a vandal-resistant panel.

ILLUMINATED BUTTON

The button is used by users to initiate a call. The button illumination indicates the progress of the call – reassuring users that the call assistance is coming etc.

FACEPLATE

The faceplate is made from brushed finish stainless steel, with the word **CALL** silk screened in black. Other finishes and alternative annotation are available on request.
