

CC 9004-204: CRU, IBUTTON, NIGHT

CORRIDOR RESET UNIT WITH IBUTTON RESET AND ILLUMINATED NIGHT LIGHT BUTTON

Large 20mm dome LED beacon

iButton reset to prevent unauthorised use

'Night' button to toggle cell night light on and off

Vandal resistant, stainless steel, faceplate, anti-tamper fixings

Surface mount in supplied back box

Suitable for use with Folknoll Custodial Cell Call Systems

CUSTODIAL CELL CALL

Our custodial cell call products range offers a comprehensive collection of tough, reliable, standard cell call units, for use in Magistrates' Courts, Police Custody Suites and similar high security establishments. Our cell call range includes Cell Call Units, Corridor Reset Units, Landing Indicator Units, Wing Office Display Units, PSUs and event log file servers. We also offer **DISABLED CELL** and **'SAFER CELL'** options including Samaritan Call, alarm strips and panic buttons. Our cell call systems can be combined with CCTV, affray alarm, general intercom, door locking control/monitoring, building alarms and other custodial systems to provide complete security solutions.

CORRIDOR RESET UNITS (CRUS)

Cell call corridor reset units (CRUs) are usually mounted outside a cell and operate in conjunction with a Cell Call Unit (CCU) inside the cell. CRUs are usually fitted with a large dome LED beacon to indicate the source of the alarm, and a keyed switch, button or iButton to reset the alarm. If an incident occurs the occupant of the cell uses the CCU to activate an alarm. The CRU indicates the source of the alarm and is used to reset the alarm by staff attending the incident. CRUs may also be fitted with additional controls for cell lights, power, etc.

CC 9004-204: CRU, IBUTTON, NIGHT

Our CC 9004-204 combines a CRU with iButton reset and a 'night' button into a vandal resistant, stainless steel, unit. The faceplate is annotated in black with the words **NIGHT** and **RESET**. The CRU is mounted in surface or flush steel backbox with anti-tamper fixings. Alternative annotation and finishes are available on request.

HIGH VISIBILITY DOME LED BEACON

The CRU has a large high-visibility LED beacon which is illuminated when its associated CCU is activated to indicate the source of the alarm. The beacon is dome shaped and can be viewed from the side, enabling alarms to be quickly identified from the end of a corridor or wing.

IBUTTON RESET SWITCH

This CRU is fitted with an iButton reset. Alarms can only be reset using an iButton fob, preventing unauthorised access and providing traceability.

NIGHT SWITCH

The CRU night switch toggles the cell night light on and off.

APPLICATION

Suitable for use with Folknoll Cell Call, SMS and Police Custody Suite Systems

SPECIFICATIONS

Faceplate:	Stainless steel, brushed finish, black annotation
Mounting:	Surface mount in steel back box (supplied)
Dimensions:	Width: 170mm, height: 170mm, depth: <40mm (approx.)
Connection:	RJ45 / screw terminals for easy installation and maintenance.
Power:	Line powered

ABOUT FOLKNOLL

We are a UK based systems design, manufacturing and installation company. Since 1975 we have been supplying tough, reliable, practical, alarm and control systems for the private and public sectors. All of our products and systems have been designed for easy installation and low maintenance by experienced engineers. As original manufacturers, all of our products and systems can be customised to suit your requirements. We also offer individual annotation, custom engraving and special finishes for all of our equipment.
