EMERGENCY ASSISTANCE ALARMS

Folknoll emergency assistance alarm systems offer cost-effective, vandal resistant, **BS 8300-2** and **DOCUMENT M** compatible solutions built from standard and bespoke units. Our alarms can be combined with disabled refuge EVCS and other systems. Ideal for **SHOPS, OFFICES, HOTELS** and other **PUBLIC SPACES**.

FOLKNOLL ALARM CONTROLLER RESET UNITS

Our reset units are local alarm controllers with integral reset buttons. The units continually monitor pull cords, call points, etc. activating beacon sounders and other indicators when an alarm is triggered. The reset button is used to cancel and reset the alarm after an incident has been resolved. Reset units are usually installed inside the alarm zone to ensure alarm responders visit the location in response to an alarm.

ALARM BEACON SOUNDERS

Beacons, sounders and combined beacon sounders are usually mounted over the entrance of an alarm zone to attract attention and indicate the source of an alarm. Depending on the layout of the site, additional beacons/sounders and/or remote indicators may be required to help ensure staff are aware of alarm activations.

DT7540.51: RESET BEACON SOUNDER, STAINLESS

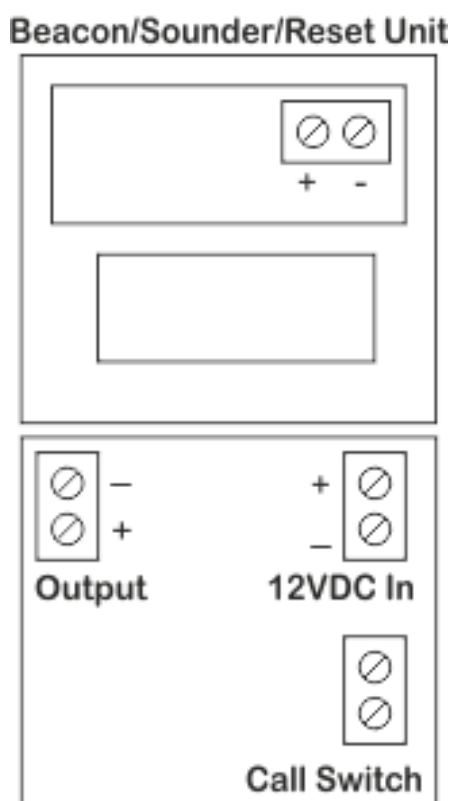

Our DT7540.51 Reset Beacon Sounder, Stainless offers a standard reset unit with choice of reset button or keyed switch and a built-in beacon sounder. The faceplate is made from brushed finish stainless steel and annotated in black with the words **ASSISTANCE REQUIRED RESET**. Other finishes and alternative annotation are available on request. This unit is suitable for can be mounting in a 35mm standard UK double gang back box.

**CURRENT BRITISH STANDARDS REQUIRE A 'REACHABLE' RESET BUTTON WITHIN THE ALARM ZONE,
THEREFORE, AN ADDITIONAL RESET BUTTON MAY BE REQUIRED**
