EMERGENCY ASSISTANCE ALARMS

Folknoll emergency assistance alarm systems offer cost-effective, vandal resistant, **BS 8300-2** and **DOCUMENT M** compatible solutions built from standard and bespoke units. Our alarms can be combined with disabled refuge EVCS and other systems. Ideal for **SHOPS, OFFICES, HOTELS** and other **PUBLIC SPACES**.

FOLKNOLL BEACON SOUNDERS

Beacons, sounders and combined beacon sounders are usually mounted over the entrance of an alarm zone to attract attention and indicate the source of an alarm. Depending on the layout of the site, additional beacons/sounders and/or remote indicators may be required to help ensure staff are aware of alarm activations.

DT7520.28: BEACON SOUNDER HORIZONTAL STAINLESS

Our DT7520.28 beacon sounder is our standard double gang overdoor beacon sounder. The unit is fitted with a large, bright, red, LED beacon and an internal sounder. The LED beacon is dome shaped and can be seen from the side. Ideal for corridors. The action of the beacon and sounder depends on the type of alarm reset/controller used. Typically, with a modern enhanced reset the beacon flashes on alarm and is steady on acknowledge, the sounder sounds intermittently on alarm.

The standard plate is made from brushed finish stainless steel and annotated in black with the words **ASSISTANCE REQUIRED**; alternative finishes and annotation are available on request. The plate has been designed to mount on a standard UK, 35mm, double-gang, back box, anti-tamper fixings are available on if required. Other format beacon sounders are available in our product range.

IDEAL FOR RETROFITTING TO EXISTING DOUBLE GANG BACK BOXES
