FOR DISABLED TOILET ALARMS

FOLKNOLL DISABLED TOILET ALARM SYSTEMS

Our disabled toilet alarm series is a range of flexible, easy to install and operate equipment, enabling you to install cost effective vandal resistant disabled toilet alarm systems. Using this range you can construct anything from stand-alone toilet alarms to site-wide systems with remote fault monitoring, events logs, graphical workstations etc.

DT7520.21 BEACON CALL POINT

Our DT520.21 Beacon Call Point combines the functions of alarm beacon and emergency call point into a single vandal resistant stainless steel unit.

These units are usually mounted on the wall inside a toilet to enable users to call for assistance.

The beacon is illuminated when the alarm is activated to provide reassurance that the alarm has been activated.

The call button must be held for at least 0.25 seconds to reduce the risk of accidental alarm calls.

The standard unit is annotated in black with the word **CALL**; alternative annotation is available on request.

These beacon call point can be mounted in double gang 35 mm flush or surface back boxes (not supplied).
