EMERGENCY ASSISTANCE ALARMS

Ensure accessibility and compliance across your **PUBLIC BUILDINGS** with Folknoll's robust, cost-effective emergency assistance alarms. Engineered for vandal resistance and compatible with **BS 8300-2** and **DOCUMENT M**. Our impressive range offers stand-alone solutions for small sites and muti-channel solutions for larger sites with a comprehensive portfolio of remote monitoring options - including dedicated cabling, SMS, Audio, networked and IP audio. Perfect for **TOILETS**, **BATHROOMS**, **CHANGING PLACES**, etc.

SINGLE GANG ALARM RESET UNITS

Our reset units are used to reset/cancel activated alarms. Reset units are usually installed in the alarm zone to ensure that are not reset remotely. (This is a requirement to comply with emergency assistance and other standards).

REASSURANCE INDICATOR

The button illumination is usually wired to mimic the action of the over-door beacon, giving the user positive visual alarm state indication within the alarm zone. Other configurations available on request.

MOUNTING

These units are all designed to be mounted on standard UK >35mm, single-gang back boxes. Anti-tamper fixings and IP65 kits are available on request.

FACEPLATE

Our standard faceplate is made from brushed finish stainless-steel with black lettering. We also offer a large range of vandal resistant and decorative faceplates. Please refer to Faceplate Options below for a complete list.
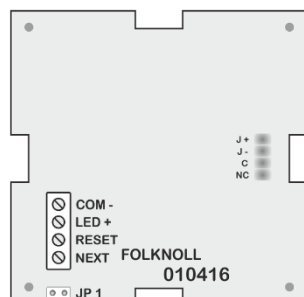

CUSTOM DESIGNS

As original manufacturer, we offer a complete customisation service for all of our products. For an in-depth consultation with one of our great engineers, contact us now with your requirements

SINGLE GANG ALARM RESET
# EMERGENCY ASSISTANCE ALARMS

ALARM CONTROLLERS AND INTERFACES

Folknoll Single Gang Alarm Reset units are fitted with optional controllers, interfaces and terminations to match various Folknoll alarms systems.
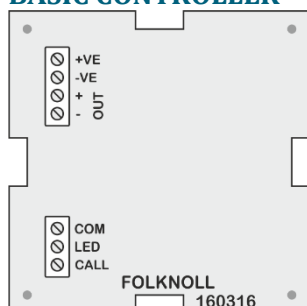

STANDARD INTERFACE

The standard interface option allows connection to external controllers and is suitable for use as a reset or additional reset for with basic, enhanced and network (SVR) controllers.

NIOSPro INTERFACE

The NIOSP interface option offers a standard interface with an additional buzzer. It is designed for use with Folknoll NIOSPro networked alarms systems, although it can also be used as a reset or additional reset for with basic, enhanced and network (SVR) controllers.
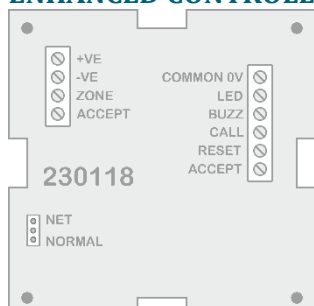

BASIC CONTROLLER

The basic controller option offers a simple alarm control system, complete with activation delay to reduce accidental activation, pull cord / call button monitoring, beacon/sounder control, reset function. This option is suitable for use with stand-alone and Folknoll RS484, SNI, NIOS and similar systems.

THIS CONTROLLER IS NOT BS 8300-2 EMERGENCY ASSISTANCE COMPATIBLE

ENHANCED CONTROLLER OPTION

The enhanced controller option offers a fully compatible emergency assistance alarm controller, complete with local and remote timed acknowledge function. This is suitable for use as a stand-alone BS 8300-2 alarm controller with or without remote monitoring. This system is compatible with remote monitoring and acknowledge Folknoll RS485, SNI, NIOS, IP INTERCOM and similar systems.
