EMERGENCY ASSISTANCE ALARMS

Folknoll emergency assistance alarm systems offer cost-effective, vandal resistant, **BS 8300-2** and **DOCUMENT M** compatible solutions built from standard and bespoke units. Our alarms can be combined with disabled refuge EVCS and other systems. Ideal for **SHOPS, OFFICES, HOTELS** and other **PUBLIC SPACES**.

FOLKNOLL ALARM CONTROLLER RESET UNITS

Our reset units are local alarm controllers with integral reset buttons. These units continually monitor pull cords, call points, etc. activating beacon sounders and other indicators when an alarm is triggered. The reset button is used to cancel and reset the alarm after an incident has been resolved. Reset units are usually installed inside the alarm zone to ensure alarm responders visit the location in response to an alarm.

DT7540.00F: ALARM RESET BASIC

The DT7540.00F Alarm Reset Basic offers a basic alarm controller with an illuminated reset button. The faceplate is made from brushed finish stainless steel and annotated in black with the word **RESET**. Other finishes and alternative annotation are available on request.

ILLUMINATED RESET BUTTON

The reset button resets (cancels) the alarm. To reduce the risk of accidental alarm reset the button must be held for a minimum of 0.25 seconds. The button illumination indicates the current alarm state to reassure users that the alarm has been activated, etc.

MOUNTING

This unit is suitable for mounting in a standard UK, 35mm, single gang back box.
