- Interface and termination options for all Folknoll alarm systems
- Standard and custom faceplates available
- Suitable for use in public areas

EMERGENCY ASSISTANCE ALARMS

Ensure accessibility and compliance across your **PUBLIC BUILDINGS** with Folknoll's robust, cost-effective emergency assistance alarms. Engineered for vandal resistance and compatible with **BS 8300-2** and **DOCUMENT M**. Our impressive range offers stand-alone solutions for small sites and multi-channel solutions for larger sites with a comprehensive portfolio of remote monitoring options - including dedicated cabling, SMS, Audio, networked and IP audio. Perfect for **TOILETS, BATHROOMS, CHANGING PLACES**, etc.

SINGLE GANG CALL BUTTON

Our Single Gang Call Button is a vandal resistant, alarm activation point with an illuminated call button. To call for help, a distressed user presses the call button. The button activates the alarm system, attracting attention and assistance.

ACTIVATION DELAY

When used in conjunction with Folknoll emergency assistance alarms, this button must be held for a minimum of 0.25 seconds before it will operate, - reducing the risk of accidental operation.

BUTTON ILLUMINATION

If fitted, button illumination is usually configured to mimic the action of the over-door beacon, giving the user positive visual alarm state indication within the alarm zone. Other configurations available on request.

FACEPLATE

The standard faceplate option is made from brushed finish stainless steel, with the word **CALL** silk screened in black. Other finishes and alternative annotation are available.

MOUNTING

This unit is designed for mounting in a standard >35mm, single-gang, UK back box. Anti-tamper fixings are available on request.

INTERFACE OPTIONS

Folknoll Single Gang Call Button units are fitted with optional interfaces and terminals to match various Folknoll alarm systems.

STANDARD INTERFACE OPTION

The standard interface option allows connection to external controllers and is suitable for use as a reset or additional reset for with basic, enhanced and network (SVR) controllers.

NIOSPro INTERFACE OPTION

The NIOSPro interface option offers a standard interface with an additional buzzer. It is designed for use with Folknoll NIOSPro networked alarms systems, although it can also be used as a reset or additional reset for with basic, enhanced and network (SVR) controllers.

IP65 GASKET OPTION

For additional ingress protection a water resistant gasket is available for this device. Please contact Folknoll for details.

IF MOUNTED ON AN UNEVEN SURFACE THE FACEPLATE MUST BE SEALED WITH A WATERPROOF SEALANT
