- Mounts on standard UK, 35mm, single gang, back box (anti-tamper fixings available)
- Interface and termination options for all Folknoll alarm systems
- Standard and custom faceplates available
- Suitable for use in public areas

### EMERGENCY ASSISTANCE ALARMS

Ensure accessibility and compliance across your **PUBLIC BUILDINGS** with Folknoll's robust, cost-effective emergency assistance alarms. Engineered for vandal resistance and compatible with **BS 8300-2** and **DOCUMENT M**. Our impressive range offers stand-alone solutions for small sites and multi-channel solutions for larger sites with a comprehensive portfolio of remote monitoring options - including dedicated cabling, SMS, Audio, networked and IP audio. Perfect for **TOILETS, BATHROOMS, CHANGING PLACES**, etc.

### SINGLE GANG CALL BUTTONS

Our Single Gang Call Buttons are vandal resistant, alarm activation points with illuminated call button or other reassurance indication. To call for help, a distressed user presses the call button. The button activates the alarm system, attracting attention and assistance.

### ACTIVATION DELAY

When used in conjunction with Folknoll emergency assistance alarms, this button must be held for a minimum of 0.25 seconds before it will operate, - reducing the risk of accidental operation.

### BUTTON ILLUMINATION AND SEPARATE REASSURANCE INDICATOR

If fitted, button illumination and separate reassurance indicators are usually configured to mimic the action of the over-door beacon, giving the user positive visual alarm state indication within the alarm zone.

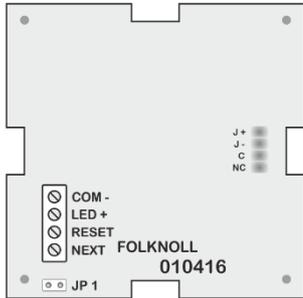

### MOUNTING

This unit is designed for mounting in a standard >35mm, single-gang, UK back box. Anti-tamper fixings are available on request.

### INTERFACE OPTIONS

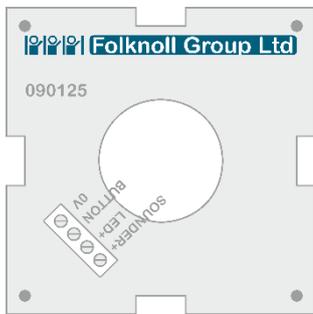

Folknoll Single Gang Call Buttons units are fitted with optional interfaces and terminals to match various Folknoll alarm systems.

#### STANDARD INTERFACE OPTION

The standard interface option allows connection to external controllers and is suitable for use as a reset or additional reset for with basic, enhanced and network (SVR) controllers.

#### NIOSPro INTERFACE OPTION

The NIOSPro interface option offers a standard interface with an additional buzzer. It is designed for use with Folknoll NIOSPro networked alarms systems, although it can also be used as a reset or additional reset for with basic, enhanced and network (SVR) controllers.

#### IP65 GASKET OPTION

For additional ingress protection a water resistant gasket is available for this device. Please contact Folknoll for details.

**IF MOUNTED ON AN UNEVEN SURFACE THE FACEPLATE MUST BE SEALED WITH A WATERPROOF SEALANT**
