Description

The 5100 series is a range of easy to install and easy to operate Fire Telephone equipment, designed to enable you and your clients to install a BS5839:9 compliant Fire Telephone System.

A Fire Telephone system is a communications network which enables fire officers, emergency staff and management to quickly and efficiently report the status of any emergency within a building to a central control room.

The Folknoll Fire Telephone System is designed to help you meet the requirements of BS5839:9 (Code of Practice for Emergency Voice Communications Systems). With cable fault monitoring, standby battery power supplies, provision for heavy fire resistant cabling etc. The system is also designed for easy installation, loop through cabling, easy configuration, easy operation reducing you and your clients costs.

Features

- Robust well proven design
- BS5839:9 compliant
- Cable fault monitoring
- Standby battery operation
- Provision for fire resistant cabling
- Loop through cabling to reduce costs

Designed For Life

As with all Folknoll products the Fire Telephone system has been designed for easy installation, simple configuration, straightforward operation, excellent testing facilities, low maintenance and high reliability.

Custom Units
