

20-WAY LED INDICATOR PANEL

FOR GENERAL ALARM SYSTEMS

FEATURES

- 20 way alarm indicator panel
- Integral sounder
- Vandal resistant alarm reset and lamp test buttons
- Power status indicators
- Green surface mount enclosure

DESCRIPTION

The Folknoll general alarm range is used to construct a wide range of MoJ alarm systems including general/officer/staff alarms and affray alarms.

The standard 20-way LED alarm general alarm indicator panel is mounted at a strategic location to alert staff when an alarm is activated.

Alarms are annunciated by an internal sounder and a zone LED.

Alarms are reset by pressing the **RESET** button on the front panel.

Units can be combined with additional LED indicator panels, LCD indicators, alarm logging units, and a range of alarm activators and annunciators to provide a complete site wide alarm system.

The indicator panel is connected to the alarm system by a multi-core cable. Screw terminals are provided for all connections.

Other sizes and colours available on request.
