

EASY STRIKE ALARM CALL POINT

Tough, stainless-steel construction

Button illuminates to indicate alarm state

Mounts in standard UK 35mm single gang back box

Compatible with all Folknoll intelligent affray and general alarm systems

INTELLIGENT AFFRAY ALARMS

Folknoll intelligent affray alarms system offers **NOMS** compliant affray alarms for high security sites and **BS 8300-2** compatible emergency assistance alarms for disabled users. We offer a range of alarm activators including call points and alarm-strips.

CALL POINTS

Call points, pull cords and alarm strips are used to call for assistance in emergency. These units are mounted in strategic locations in accordance with current standards, enabling distressed persons to activate alarms. Depending on the system configuration, beacons, sounders and remote monitoring units will alert staff and others to respond to incidents.

IA9090.13: ILLUMINATED AFFRAY MUSHROOM BUTTON

Our IA9090.13 offers an illuminated alarm call button to call for assistance. The faceplate is made from brushed finish stainless steel and annotated in black with the word **AFFRAY**. Other finishes and alternative annotation are available on request.

CALL BUTTON

The call button is a large, tough, finger or palm operated mushroom 'strike' button. The unit is usually supplied with a red call button, other colours are available on request.

BUTTON ILLUMINATION

The button illumination indicates the alarm state, offering reassurance to users and acts as a deterrent to unwanted activity.

When connected to a **FOLKNOLL INTELLIGENT AFFRAY ALARM** system the button illumination behaves as follows:

- **ON/STEADY:** system operating normally and ready for alarm activation
- **FLASHING:** alarm activated
- **OFF:** system fault

MOUNTING

This unit can be mounted in a standard UK, 35mm, flush, single gang, back box (not supplied).
