### INV 9010-000 INTERVIEW ROOM STATUS INDICATOR SYSTEM

Our INV 9010-000 INTERVIEW ROOM STATUS INDICATOR SYSTEM provides a simple means of indicating the occupancy/usage state of a room. The system comprises a small control point and an overdoor indicator.

#### OVERDOOR INDICATOR

The overdoor indicator has large red and green LEDs to indicate the status of the room and the faceplate is engraved and painted with the words **ENGAGED** and **ENTER** to avoid ambiguity.

#### CONTROL POINT

The control point has two buttons and two room status indicator LEDs. The buttons enable the user to select the room status. The control point status indicator LEDs mimic the overdoor indicator LEDs providing visual feedback of the currently selected room status.

#### SIMPLE OPERATION

Press the red button once to indicate 'engaged', press the green button once to indicate 'you may enter', press either button twice to turn off all the LEDs and indicate 'room unoccupied'.

#### EASY TO INSTALL

Both devices mount in standard UK 35mm single gang back boxes and require a simple 12Vdc PSU.

## **SPECIFICATIONS**
