# OPERATOR WORKSTATION FOR MONITORING NIOSPro ALARMS AND FAULTS

Up to 20-off Workstations in a single NIOSPro system

Fully synchronisation with other Workstations and Displays

Displays configurable alarm and fault descriptions

BS 8300-2 compatible remote acknowledge

AIO. touch screen, PC format to suit site requirements

#### **FULL NIOSPro SYSTEM COMPATIBILITY**

### FOLKNOLL NIOSPro NETWORKED ALARM MONITORING

NIOSPro network alarm monitoring systems offer a great way to add remote monitoring to local alarm systems. NIOSPro comprises up to 200 alarms monitored by multiple remote Folknoll Displays and Workstations - ensuring alarms are reported where they can be seen. NIOSPro systems take advantage of existing network infrastructure to offer cost-effective solutions for **LARGE SITES**, including **OFFICES**, **HOTELS**, **HOSPITALS** and other **PUBLIC SPACES**.

# NP 7900-201 NIOSPro WORKSTATION

This Workstation is the NIOSPro upgrade for our popular NIOS PC Workstation. The Workstation is based on a standard Windows® PC and is usually supplied fully configured for the target site network with an appropriate site plan and meaningful alarm names – **Ready for Installation**.

#### **MULTIPLE OPERATORS**

NIOSPro Workstations are fully integrated into the NIOSPro system architecture allowing multiple synchronised operator stations on a single. Up to 20-off Displays and 20-off Workstations can coexist on a single NIOSPro system.

## ALARM GROUPING

Individual Workstations can be configured to report some or all system alarms and so can be used to monitor some or all of the alarms on a NIOSPro system. So, for example, if a site has several buildings and one control room, a system could be configured such that, each building has a local operator, and the central control room has one or more sitewide operators.

#### **POWER**

NIOSPro Workstations are usually mains powered and can be supplied with a UPS to suit site requirements and power fail strategies.

#### MOUNTING

NIOSPro Workstations can be supplied with wall brackets and other mounting options, please specify when ordering.

#### **CUSTOM FORMATS**

The Workstation PC is usually supplied as a touch screen with NUC sized PC; but can be supplied alternative formats to suit client requirements.

# NIOSPro SYSTEM SPECIFICATIONS

Max Alarm zones	200
Alarm modes	Emergency assistance
Max Displays	20
Max Workstations	20

# NIOSPro WORKSTATION SPECIFICATIONS

PC	Windows® PC, format as required (AIO, NUC, desktop, etc.)
Storage	As required (log size, etc.)
Display	As required (touch screen, all mount, minimum true HD
Network	Configuration as required (in agreement with network admin)
Power	Mains, UPS as required

# ABOUT FOLKNOLL

We are a UK based systems design, manufacturing and installation company. Since 1975 we have been supplying tough, reliable, practical, alarm and control systems for the private and public sectors. All of our products and systems have been designed for easy installation and low maintenance by experienced engineers. As original manufacturers, all of our products and systems can be customised to suit your requirements. We also offer individual annotation, custom engraving and special finishes for all of our equipment.

# **GET IN TOUCH**

Please contact us for further information about our wide range of products and services and find out how we can provide a solution for you.
